

# Public Involvement Meeting

Project I.D. 7841-00-04  
Town of Beaver, Riplinger Road  
Nelson Creek Bridge P-10-0937  
Clark County

*June 19, 2024*

## **Welcome**

Welcome and thank you for attending the Public Involvement Meeting for the Riplinger Road bridge replacement project. Mead & Hunt, Inc. has been selected by the Town of Beaver to provide design engineering services for the reconstruction of the Riplinger Road Bridge over Nelson Creek in the Town of Beaver. We are nearing completion of the preliminary design. Your input today is essential in the planning and design for this project, so please feel free to ask questions or express your comments and concerns on the comment sheet that is provided at the end of this packet.

## **Meeting Purpose**

The purpose of this meeting is to gather public input, as well as to inform you about the proposed project. The meeting will follow a virtual presentation format.

## **Project Need and Scope**

The current bridge on Riplinger Road over Nelson Creek has been rated as structurally deficient. This project will replace the existing single-span, steel girder bridge with a new single-span concrete slab bridge. The project will also make upgrades to the bridge approaches. The total project length is not expected to exceed 150 feet. Construction is currently scheduled to be completed during the 2026 construction season. Riplinger Road will remain open to traffic during construction via a temporary bypass road. Construction work is expected to take 2-3 months to complete.

## **Public Involvement**

Public input is an important part of the design process, and your comments are welcome. A comment sheet is provided at the end of this handout for your use. To become part of the public record, all comments should be postmarked no later than July 12, 2024.
